

# Tee Box

Where do you place your tee ball? If the answer is right in the middle of the teeing ground, you may want to rethink your approach. For most straight forward golf holes this is an acceptable way to play your first shot, but if not use the following 3 strategies to help you on the tee box.

1. **Same side as trouble:** By placing the tee shot on the same side of trouble you will have the opportunity to hit away from danger.
2. **Opposite side of a dog leg:** By placing the tee shot on the opposite side of a dog leg you will have a larger landing area with a better angle of attack.
3. **Play the miss:** Some days you're just not hitting the tee ball the best and consistently missing on one side or the other. Play your tee ball on the same side as your miss. By placing the tee shot on the same side you will create more wiggle room for the wayward tee shot.
